Hello photo mosaic community,

I was wondering if anyone out there knew how to create something like this example:

<http://www.picturemosaics.com/purchase/scatter.php>

I really like this scatter effect however I have know idea how to begin designing something like this. Any help would be appreciated :cheer:

Hi JackG, I also looked at these scatter mosaics. I don't know too much about them, but it seems the one big benefit is that you dont have to crop, or really even organize your photos. They just get thrown around to form the picture. It's really cool.

The link you have is the only place I've seen that does that scatter mosaic, so I would assume they can answer in more detail. Good luck in your research!
