## Multi-Size Cell Mosaics?!?

Posted by MiriamBallord - 2009/09/25 10:09

---

Hi all,  
I am looking for any help in trying create a multi-size cell mosaic. If you do not know what I talking about please check out some of the following links where I have found example of my project idea ;)

Example 1 from LA Times  
Example 2 from photo mosaics  
Example 3 from photo mosaics

Any help would be great!  
Thanks in advance

Miriam

Yeah I have seen these as well...

Unfortunately, I do not know of any software that is currently offered (both either free or paid) that can do this. I know that these types of mosaics are very difficult to create. They require extreme thought in the layout/grid pattern, unless this is all done with a complex computer algorithm...

I wish I could find something that could do something like this.
