Picture Mosaics was started in 2001 and is oldest and most experienced custom mosaic company on our list. They offer a large variety products which include custom printed mosaics, large scale mosaics, jigsaw puzzle mosaics, video mosaics, animated mosaics, and interactive mosaics. They seem to have one of the largest design studios and print facilities of all mosaic companies we have reviewed. We spoke with a few of their designers and they were very knowledgeable and excited about their products. They explained briefly how some of their unique mosaic algorithms work (a deep and complex analysis of color and shapes - read their [tech page](#) for more info). We thank the project director, Albert, for spending so much time explaining all aspects of their products and services – we learned a lot!
